Date: 9/4	Note taker: G. Dingman
GB MAC/GACC Coordinator: Agenda/Incident Commander Discussion Points: <u>Summarize the following in 4 min or less:</u> <ul style="list-style-type: none"> • Fire Size / % contained / # of people / Cost to date • Significant changes since the last 209 • BRIEF fire synopsis /Critical Incident Information (use Directional vs DIVS's) • Political Issues / Community Meetings • Closures / Evacuations / Public Safety Issues • Major Safety Concerns / Injuries / Accidents • Critical Resource Needs • Resources Available to Reassign/Share/Demob 	
Predictive Services:	<p>Cooling & Moistening Trend This Weekend...</p> <p>Latest guidance suggests strengthening SW winds today along with still moderately dry humidity levels across parts of Nevada and Western Utah. In these areas we expect winds of 20-35 mph with gusts of 50 mph in localized areas. Given that we will be entering a holiday weekend, increasing the human element, we have updated our forecast to issue HIGH RISK for Wind in these areas (refer to map). Moderate winds could linger across these areas into Saturday.</p> <p>Otherwise, clouds and precipitation have moved into many northern areas along with much higher humidity levels. Widespread light to locally moderate precipitation has occurred across the mountains of ID. Precipitation will become steadier and more widespread across ID by late today thru Saturday. Areas of Northern NV and parts of UT will also see some scattered shower activity. Precipitation amounts in Central Idaho are expected to range from 0.35 to 0.75 inches during this prolonged stretch of cool, moist weather...with lesser amounts and spottier coverage further south. Snow levels in ID on Saturday could drop down to 6000 ft with several inches of accumulation.</p>
GBCC Update:	7 fires / 868 acres / new acres on large fires – 9932 Moving from PL4 to PL3 today
1 Fire: Tepee Springs IC: Ourada	<ul style="list-style-type: none"> • 94655 / 45% of objectives / 10164 • West side: received some precip. Most of the system went North of the burn. • Southern side: starting some rehab • West side: completing direct line toward the SE and continuing to the S to tie into Patrick RX. • North of the river on the west side, working direct and indirect to tie into the 2012 fire scare. • North/NE corner, mopping up and connecting with the road system to get a good line. Prepping and preparing for historical buildings wrapping.

Appendix 7
